Forklift Barriers

Factory Fixtures

At Steelman

Engineering, we view Health and Safety with the utmost importance. We stay abreast of current legislation to ensure that once we have completed an installation, your factory is fully compliant with all rules and legislations.

We aim to provide solutions and products of the highest quality, a service feature which is reflected by the quality of our customer base. Industrial furniture projects have been completed to the satisfaction of:

- Tesco
- Ryobi
- FG Wilson
- The NI Fire Authority
- La Mon Hotel & many more

Designed and manufactured in-house at our facilities in South Belfast, we ensure that pricing is extremely competitive and that NO third party costs are incurred. A team of expert designers compliment the production staff to ensure you receive the complete service. Our product portfolio of industrial furniture includes:

- Handrails
- Guarding
- Forklift Barriers
- Stairs & Fire Escapes
- Heavy Duty Storage Racking

Forklift Barriers

Heavy Duty Storage Racking

Machine Guarding

Safety In Mind.

Due to increasing Health and Safety Legislation and the spread of "claim culture", health and safety can no longer be left on the 'to do' list, or employees left to take responsibility for their own actions.

It needs to be addressed today.

Steelman Engineering provides the full professional service.

Beginning with an on-site consultation at your convenience right through to the manufacture and installation of your requirements.

All fixtures supplied are designed and fabricated for your factory. We do not buy in a third party product and adapt them to your needs.

Forklift Barriers:

How are employees and the fabric of your building protected from the impact from forklifts?

Steelman Engineering provides forklift barriers with the following unique features:

Maximum strength design with heavy duty construction

Finished in high visibility yellow

500mm high with optimum spacing of uprights

Handrails can be added if a safe walk way is required

Ground level U.C. to protect wall against toe damage

Higher PFC to protect against counter balance damage

Heavy Duty Storage Racking:

Do you want to free up some floor space?

Steelman Engineering provides storage solutions for heavy, awkward or long items, which are designed specifically for your requirements.

Heater Guard

Guarding:

We produce guarding to protect operators from dangerous processes or to create secure areas on the factory floor for storage. Steelman Engineering assesses your requirements and your guarding is finished with the most appropriate infill.

Options include:

Lexan

Weldmesh

Sheet Steel

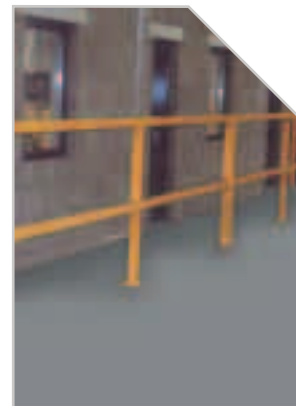

Handrails:

Handrails manufactured specifically to your requirements and in accordance with Health & Safety Legislation.

Stairs and Fire Escapes:

Steel stairs for internal use and fire escapes manufactured to all current legislation.

Available in a multitude of finishes and designed in-house to your exact specification.
